

## **.NET Developer**

### **Job Description**

Your primary responsibility will be to design and develop components of corporate enterprise banking applications using Microsoft technologies and popular web frameworks. A commitment to collaborative problem solving, clean design, and product quality is essential.

### **Responsibilities**

- Translate business requirements and use cases into functional applications
- Build and maintain efficient and reliable code
- Identify bottlenecks and bugs, and implement solutions to address the issues
- Maintain code quality and automatization
- Build tailored web applications and customize solutions built on Microsoft products

### **Skills**

- Strong knowledge of .NET framework, several years of experience implementing enterprise web applications with .NET
- Strong understanding of object-oriented programming
- 3+ years of experience with popular HTML 5 frameworks
- Familiar with various design and architectural patterns, fundamental design principles for building a scalable application
- Familiarity with Microsoft SQL Server
- Writing clean, readable, reusable and easily maintainable code
- Highly appreciated – experience customizing Microsoft products (Dynamics CRM, SharePoint)
- Dynamics CRM 365 or SharePoint Online experience is a plus
- Nice to have - experience implementing automated testing and unit tests
